

Practicing of Old National tests w. 2-4

What?

You are going to learn to know more about the different parts of the National test (NP). You will be practicing doing some old tests; (the writing, the reading and the listening part).

Why?

The national test in English is an essential part when learning English since the test covers all skills and the different targets students of year 9 in Sweden need to reach. Although the national test itself does not provide the students with grades in English, they work as a good complement for teachers in terms of assessing the students.

How?

We will start off with the writing part w. 2. The reading part will take place w. 3 and the listening part will be dealt with w. 4. Some aspects of grammar will naturally be dealt with during these weeks. During the writing part, feedback will be given as your work proceeds. You will also have access to old pieces of writing completed by students that have been assessed for their production. The reading and listening part will be assessed by normal standards, that is according to a key that "Skolverket" has attached. Your teacher will keep up a dialogue with you along the practicing of old tests in order to spot any skill (s) you need to develop.
